trailingSlash

By default Next.js will redirect urls with trailing slashes to their counterpart without a trailing slash. For example `/about/` will redirect to `/about`. You can configure this behavior to act the opposite way, where urls without trailing slashes are redirected to their counterparts with trailing slashes.

Open `next.config.js` and add the `trailingSlash` config:

```js
next.config.js
1  module.exports = {
2    trailingSlash: true,
3  };
```

With this option set, urls like `/about` will redirect to `/about/`.

Version History

Version	Changes
`v9.5.0`	`trailingSlash` added.
